Drawer & Door Adjustment

To remove drawer:

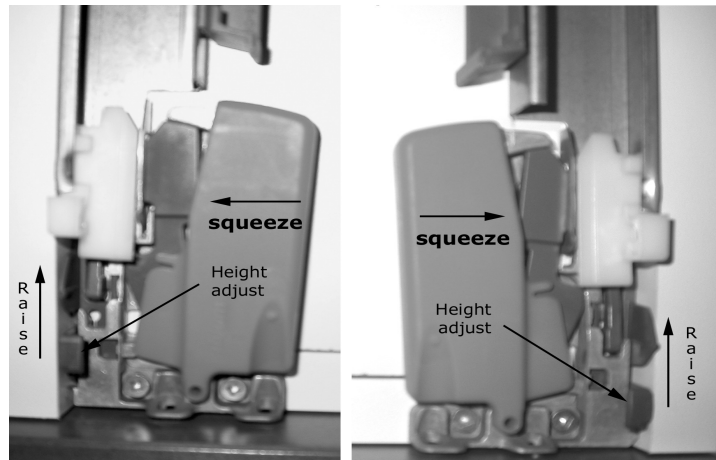

Locate orange levers underneath drawer at front.
Grip drawer with both hands at sides of drawer and fingers squeezing levers.
Pull drawer out to its full extent and lift up.

To install drawer:

Fully extend slides from cabinet.
Place drawer onto slides.
Push drawer all the way closed until latches click.

To align drawer fronts:

Raise or lower drawer on either side by sliding tapered wedges as shown in diagram.

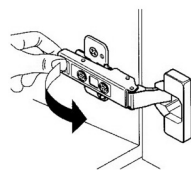

To remove doors:

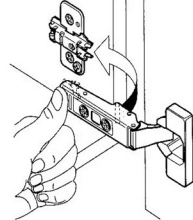

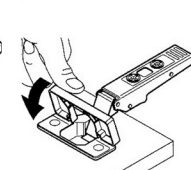

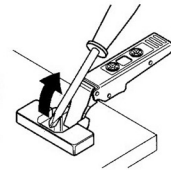

Doors are released from the cabinet by pulling the latch, at the rear of the hinge, away from the side of the cabinet.

Door hinges are clipped on to cabinet by setting hinge against the front of the mounting plate and pushing the back of the hinge firmly towards the side of the cabinet.

Removal INSERTA

Assembly INSERTA

To adjust doors:

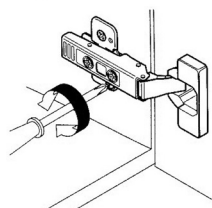

Doors are aligned using hinge adjustment screws. (See diagram)

To adjust height turn screws on both top & bottom mounting plates.

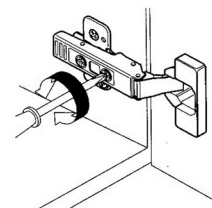

Use side adjustment to keep edge of door parallel with side of cabinet.

Use depth adjustment to control space between door and cabinet.
